After each chassis number above, there are a series of numbers to make the chassis number up to a total of 17 digits.

Please Note: The chassis numbers above are a guide only. We may need a full chassis number if the vehicle was built between the dates specified

## UNDERSTANDING MODEL AND CHASSIS NUMBERS

Every Land Cruiser that comes off the production line in this country has 17 digits in its chassis number. The only exception is on an imported Land Cruiser, these will have between 11 and 13 digits in its chassis number. For us to be able to supply parts for these imported Land Cruisers we would also require a model number, these model numbers will have 2 to 4 letters followed by 2 to 4 numbers followed by 3 to 8 letters.
